

## Accredited Direct Connect Agency

East West Fingerprinting is an RCMP Accredited Direct Connect Fingerprinting Agency. A Direct Connect client is that employs its own technological systems connected to the RCMP. We have our own computer server, connected by a VPN to the CCRTIS (Canadian Criminal Real Time Identification System) in Ottawa **directly** and **not like resellers** which do not have their own server and they have to submit fingerprints via another Direct Connect client paying additional fee and thus more expensive.

This technology is being used by the RCMP at the Civil Fingerprinting Division to match non-criminal fingerprinting submissions to the information on file in CPIC (Canadian Police Identification Centre).
